|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic         | <ul style="list-style-type: none"><li>• Finding compilation triggers a publication process</li></ul>                                                                                                                                                                                                                          |
| Preparation   | <ul style="list-style-type: none"><li>• Includes steps such as: open access and open data strategy, publication medium, export control, literature review in addition to the previous work</li><li>• Synergies with other steps in the research process, especially formal requirements such as funding regulations</li></ul> |
| Editing       | <ul style="list-style-type: none"><li>• Convert artifacts, findings and the knowledge generated into text and text-supplementing elements</li><li>• Derive the methodology to be described from the previous steps of data generation</li><li>• Publish and reference artifacts and findings</li></ul>                        |
| Submission    | <ul style="list-style-type: none"><li>• Includes submission to the publication medium, peer review and subsequent revision, final publication</li><li>• Content is more comprehensible for peers because the research data is available and its provenance is clear.</li></ul>                                                |
| Dissemination | <ul style="list-style-type: none"><li>• Disseminate publication in accordance with funding requirements</li><li>• Particularly target group-oriented communication by sharing text and/or research data</li></ul>                                                                                                             |
